SURGICAL ELECTRO-CAP

The ECI Surgical Cap (CS 2000) is a strapless Electro-Cap designed to be used for intraoperative EEG monitoring. The cap fits the head securely, thereby eliminating the need for chin straps or body harness. Surgical style available for all caps manufactured by Electro-Cap.

SPECIAL ORDER ELECTRO-CAPS

Special Order Electro-Caps, in standard or special sizes, with customer specified electrode locations, with electrodes made of either tin or silver/silver chloride, can be provided. Special Order Electro-Cap Forms are available.

Special Order Electro-Caps are priced individually, based on the total number and placement of electrodes, the metal used for the electrodes, and any other special features that are to be incorporated into the cap design.

TOPOGRAPHICAL EEG ITEMS

Electro-Caps are made specifically for many brands of EEG and brain mapping equipment. We have listed only a few of the ones available. If you don't see what you need, please contact us and we will let you know what we have that will work with your equipment.
